

WEDME

Online matrimonial site

ABSTRACT

The 'WEDME' matrimonial site is developed to let individual find their potential matches for marriage as per their priorities. The website project provides a user friendly interface that allows users to create profile, search for compatible matches, membership features (Packages-Gold, Bronze, Silver) and can message with each other. Users can also post their marriage opinion. This application allows browsing profiles of other registered users on the site. The person looking for marriage can register and search for a profile that matches their requirement.
